

The characters before the first dot indicate what board you have. Here, MV85010A identifies the standard Intel® Desktop Board D850MV. 86A indicates a standard Intel version (86B, 86C, or 86E are also used on some older boards). If the first two sections do not match, then your desktop board was manufactured for a specific OEM.

Older Intel desktop boards used a BIOS pattern like this:

```
1.00.12.CS1
```

The characters CS1 identify which Intel desktop board you have, in this case a VS440FX board.

Micronics ID Strings

Refer to *Phoenix*, as Micronics make their own Phoenix upgrades.

Packard Bell ID Strings

Normally check the FCC number on the back of the system unit. For example:

400-409 = PB400
410-449 = PB410 or 430
450-459 = PB450

Phoenix ID Strings

These start with a product family identifier (4A3NT0X in this example):

4A3NT0X0.86A.0047.P03.9704071222

It decodes to AN430TX (i.e. Anchorage). 4L3TT0X would be LT430TX (Lonetree). The number after the X is the revision. 86 is the BIOS OEM ID (Intel here), and the next letter indicates the type of motherboard:

A Consumer Desktop
B Corporate Desktop
C Server Products

0047 is the BIOS build number. P is the BIOS release type:

P Production (03 is the production release number)
D Development
A Alpha
B Beta

9704071222 is the BIOS build date and time (here, 7 April 1997 at 12.22).

Sony Vaio ID Strings

For PCG F1xxx, F2xxx and F3xxx (though not for the F370/F390). These have a Phoenix BIOS that is generally not compatible with Windows 2000, shown by the first three letters of the ID string. It is normally R02, but will be W2K if OK. The last two letters specify the BIOS type, and they have to be K0. In the middle are two digits like 05 or 06, so it will look something like:

W2K06K0

Tandon ID Strings

The BIOS is not actually identified, but the version should be at the top right-hand of the screen.

Tyan ID Strings

TYAN motherboards use AMI or Award BIOSes. The version can be found at bootup just below the left hand corner logo (ignore those that do not start with TYN):

TYN [motherboard model] Vx.xx MM/DD/YY

x.xx is the BIOS version number, and MM/DD/YY is the release date.
